

# SMPS News

## Message from Sukumar M. Parikh

Sukumar Parikh participating  
in a technical seminar.

With good wishes from all, we are happy to come out with this News letter to-day. We are also in the process of creating a new website incorporating several new projects.

As earlier, the news letter attempts to cover some noteworthy achievements and involvement of SMPS. Photographic gallery tries to depict various on-going or completed projects. SMPS continues to thrive with works through continuing clients as also from new clients.

We include a few letters received from our worthy clients-the selection of such letters is random, out of several that we receive.

New initiatives within SMPS office include installation of many indoor games, inter alia, table tennis-which has become a run-away favourite. With a manual treadmill, many persons sweat out their flabs too!

I wish to thank our clients for reposing their faith in SMPS and proffer my gratitude to those who have sent us their "Say about SMPS". My thanks to members of various committees within SMPS in particular and all others in general.

25th September 2008

NEWS-3

## TECHNICAL CORNER

**NIRMA LIMITED** at their Soda Ash Plant near Bhavnagar had an existing 100m. high, 6m. diameter R.C.C. chimney with three flue ducts connected to it. Having decided to expand the plant capacity (with an additional boiler) and for discharge of the flue gases from this additional boiler, fourth flue duct had to be connected to this chimney. The **challenge** was cutting 450mm. thick R.C.C., approximately at a height of 12m. above ground level, of size 2.2m. x 3.2m. in a wedge shape and then **horizontally pulling out** the cut concrete weighing **8 tons**.

The whole concept and detailed execution drawings for a safe and fool-proof implementation was developed by SMPS. For proper preparations and planning, '**execution aids**' were prepared in the form of:

- List of activities
- Sequence of activities for civil works
- Notes on cutting and removing concrete block
- Detailed drawings, meant to ensure precise and time-bound execution with micro timing

The work was later executed, exactly as planned, by specialized contractors.

Entire operation i.e. cutting of concrete using diamond-edge concrete cutters, removal of cut concrete by pull-out force at 12m. height through a winch mounted on the boom of a high capacity crane and inserting the mild steel flue piece including grouting was successfully and safely executed within two days time available during shut-down. Photographs depict the scale and complexity of operations.

## SMPS SOCIAL RESPONSIBILITIES

Dr. Mukundbhai Mehta addressing on healthcare.

Co-sponsoring English teaching and self-reliance activities for girls and women.

## SMPS FUN CLUB

### PAST EVENTS FUN AND FROLIC

Frolicking in Water Park - Mehsana

# TESTIMONIAL

Dr. K. K. PATEL

I am happy to give this testimonial to M/s. SMPS Consultants Pvt. Ltd., Ahmedabad in acknowledgement of their association with us for the past two decades. M/s. SMPS Consultants have provided us various types of services in the areas of Architectural Engineering, Structural Designs, Electrical and Utility designing etc., for our Soap and Detergent Plant Complex at Mandali, near Mehsana (NG), Detergent Plant Complex at Savli near Baroda and Soda Ash Plant at Kalatalav, near Bhavnagar.

During the period of our association, I have had occasion to come across many engineers of SMPS who were involved with Nirma Group projects and I appreciate their wholehearted dedication in the implementation of our projects to the extent of their role.

I wish to put on record that the services provided by M/s. SMPS Consultants Pvt. Ltd. have been very good and prompt to meet with time lines and other requirements.

I wish all the very best for the future of M/s. SMPS Consultants Pvt. Ltd.

*K. K. Patel*

## TO WHOM IT MAY CONCERN

We at Jyoti CNC Automation Pvt. Ltd. have worked with SMPS Consultants Pvt. Ltd. since the year 2002 and currently they are our Consultants for our further expansion of machine shop building.

We have found SMPS and their engineer's team soaring on integrity and commitment. Their quality of work, precision and accuracies are unparalleled. It is quite harmless to say that, at present they are the best known project consultants in civil, structural, architectural, power electrical, HVAC and utility engineering in the country. Such an overall line-up gives SMPS an edge in its vocation.

We wish all the best to SMPS for the years to come and we are confident that they will play a pivotal role in nation's industrial growth and economical progress.

December 21, 2007

We have known SMPS CONSULTANTS PVT. LTD. for about 10 years now. During my first interaction with Shri Sukumarbhai Parikh I found him to be a very simple and unassuming person, willing to listen, yet very professional in his approach. Since that first meeting, SMPS has been our Designers and Consultants for several projects for our various sites including Ankleshwar, Solapur and Panoli.

We have found SMPS to be a firm of Consultants, typically conventional, but with very non-conventional ideas. The personnel working with SMPS are all devoted, sincere and hard working. The services rendered by SMPS have been timely and efficient. In short, it has been a pleasure working with SMPS and we hope to see this relationship growing and getting stronger in times ahead.
